About

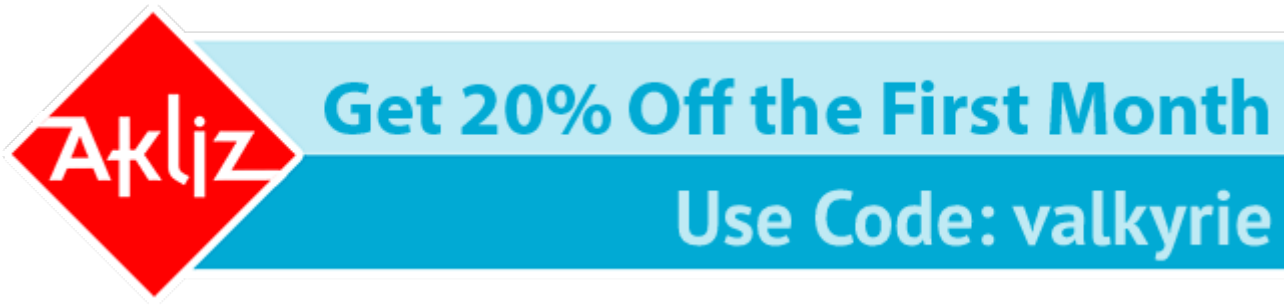

ValkyrieofNight is mostly known for his Environmental Tech series of mods featuring a vast selection of multiblock machines and technology. You can find out more info about those mods here.

ValkyrieofNight started Team Kryptic Link in order to pursue more mod/modpack projects in a collaborative format. The team has several mod and modpack projects in the works and has taken over some of ValkyrieofNights mods such as Simple Generators, Simple Chunk Loaders and Starter Kits. All mod projects created by Team Kryptic Link use ValkyrieofNights lib mod, ValkyrieLib, to help ease and speed up development.
